

# CHEMICO-BIOLOGICAL INTERACTIONS

## SUBJECT INDEX

VOLUME 70 (1989)

- A549 cells, glutathione, glutathione disulfide, glutathione *S*-sulfonate, mixed disulfides, 145
- Acetaminophen, oxidant stress, biliary GSSG efflux, diethyl maleate, 241
- Acridine dimers, nitracrine, DNA binding, inhibition of RNA synthesis in vitro, 73
- Adenine, DNA methylation, dimethyl sulfate, ethyleneimine, guanine, *N*<sup>3</sup>-methyl-*N*<sup>3</sup>-formyl-2,5,6-triamino-4-oxopyrimidine, 289
- Aldehydes, methylglyoxal, 4-hydroxypentenol, Yoshida ascites hepatoma AH-130, cell cycle, labelled mitoses, 227
- N*-Alkoxyacetic acids, structure-hematotoxicity relationships, hemolysis, erythrocytes, ethylene glycol ethers, ATP depletion, 339
- m*-AMSA, doxorubicin, redox interaction, 103
- Antitumour drugs, DNA alkylation, DNA interstrand cross-links, reductive activation, 249
- Aryl hydrocarbon hydroxylase, benzo[*a*]pyrene-DNA-adducts, synchronous fluorescence spectrophotometry, monooxygenase, cigarette smoke, mouse, 51
- ATP depletion, structure-hematotoxicity relationships, *N*-alkoxyacetic acids, hemolysis, erythrocytes, ethylene glycol ethers, 339
- Benzo[*a*]pyrene-DNA-adducts, synchronous fluorescence spectrophotometry, aryl hydrocarbon hydroxylase, monooxygenase, cigarette smoke, mouse, 51
- Benzo[*a*]pyrene diol epoxide, glutathione transferase, human skin, conjugation, 173
- Biliary GSSG efflux, acetaminophen, oxidant stress, diethyl maleate, 241
- Bleomycin, singlet oxygen, peroxidase, eosinophil, neutrophil, lipoxigenase, 1
- Cadmium, human lymphocytes, metallo-thioneins, flow cytometry, 117
- Cell cycle, aldehydes, methylglyoxal, 4-hydroxypentenol, Yoshida ascites hepatoma AH-130, labelled mitoses, 227
- Chemical vs. EPR purity, 5,5-dimethyl-1-pyrroline-*N*-oxide, synthesis, purification, storage, experimental synthetic precautions, spin trapping, 167
- 2-(2-Chlorophenyl)-2-(4-chlorophenyl)-1,1-dichloroethane (DDD), dichlorodiphenyltrichloroethane (DDT), lung, covalent binding, mouse, 63
- Cigarette smoke, benzo[*a*]pyrene-DNA-adducts, synchronous fluorescence spectrophotometry, aryl hydrocarbon hydroxylase, monooxygenase, mouse, 51
- Cisplatin, glutathione, nephrotoxicity, toxicity, 89
- Conjugation, glutathione transferase, human skin, benzo[*a*]pyrene diol epoxide, 173
- Covalent binding, 2-(2-chlorophenyl)-2-(4-chlorophenyl)-1,1-dichloroethane (DDD), dichlorodiphenyltrichloroethane (DDT), lung, mouse, 63
- Cytochromes *P*-450, molecular orbitals, mixed-function oxidations, 263
- Cytochrome *P*-450-system, levonorgestrel, rat liver, ultrastructure, mitochondria, glutathione, glutathione *S*-transferase, 157
- Cytotoxicity, hydrogen peroxidase, superoxide, superoxide dismutase, *Escherichia coli*, 281
- Diaminocyclohexaneplatinum(II), DNA-adducts, nuclear magnetic resonance, 39
- Dichlorodiphenyltrichloroethane (DDT), 2-(2-chlorophenyl)-2-(4-chlorophenyl)-1,1-dichloroethane (DDD), lung, covalent binding, mouse, 63
- Diethyl maleate, acetaminophen, oxidant stress, biliary GSSG efflux, 241
- 5-5-Dimethyl-1-pyrroline-*N*-oxide, synthesis, purification, storage, experimental syn-

- thetic precautions, chemical vs. EPR purity, spin trapping, 167
- Dimethyl sulfate, DNA methylation, ethyleneimine, adenine, guanine, *N*<sup>6</sup>-methyl-*N*<sup>6</sup>-formyl-2,5,6-triamino-4-oxypyrimidine, 289
- DNA-adducts, diaminocyclohexaneplatinum (II), nuclear magnetic resonance, 39
- DNA alkylation, antitumour drugs, DNA interstrand cross-links, reductive activation, 249
- DNA binding, nitracrine, acridine dimers, inhibition of RNA synthesis in vitro, 73
- DNA interstrand cross-links, DNA alkylation, antitumour drugs, reductive activation, 249
- DNA methylation, dimethyl sulfate, ethyleneimine, adenine, guanine, *N*<sup>6</sup>-methyl-*N*<sup>6</sup>-formyl-2,5,6-triamino-4-oxypyrimidine, 289
- Doxorubicin, *m*-AMSA, redox interaction, 108
- Enzyme activities, glutathione *S*-transferases, mRNA, regulation, perfluorodecanoic acid, 127
- Eosinophil, singlet oxygen, peroxidase, neutrophil, lipoxigenase, bleomycin, 1
- Eosinophil peroxidase, peroxidases, myeloperoxidase, thiols, oxidation, peroxidase-oxidase, 323
- Erythrocytes, structure-hematotoxicity relationships, *N*-alkoxyacetic acids, hemolysis, ethylene glycol ethers, ATP depletion, 339
- Escherichia coli*, hydrogen peroxidase, superoxide, superoxide dismutase, cytotoxicity, 281
- Ethyleneimine, DNA methylation, dimethyl sulfate, adenine, guanine, *N*<sup>6</sup>-methyl-*N*<sup>6</sup>-formyl-2,5,6-triamino-4-oxypyrimidine, 289
- Ethylene glycol ethers, structure-hematotoxicity relationships, *N*-alkoxyacetic acids, hemolysis, erythrocytes, ATP depletion, 339
- Experimental synthetic precautions, 5,5-dimethyl-1-pyrroline-*N*-oxide, synthesis, purification, storage, chemical vs. EPR purity, spin trapping, 167
- Flow cytometry, human lymphocytes, metallothioneins, cadmium, 117
- Glutathione, cisplatin, nephrotoxicity, toxicity, 89
- Glutathione, glutathione disulfide, glutathione *S*-sulfonate, A549 cells, mixed disulfides, 145
- Glutathione, levonorgestrel, rat liver, ultrastructure, mitochondria, glutathione *S*-transferase, cytochrome P-450-system, 157
- Glutathione, mitochondria, myocardium, liver, glutathione-depletion, oxidative protection, 29
- Glutathione-depletion, glutathione, mitochondria, myocardium, liver, oxidative protection, 29
- Glutathione disulfide, glutathione, glutathione *S*-sulfonate, A549 cells, mixed disulfides, 145
- Glutathione *S*-sulfonate, glutathione, glutathione disulfide, A549 cells, mixed disulfides, 145
- Glutathione *S*-transferase, levonorgestrel, rat liver, ultrastructure, mitochondria, glutathione, cytochrome P-450-system, 157
- Glutathione *S*-transferases, mRNA, regulation, perfluorodecanoic acid, enzyme activities, 127
- Glutathione transferase, human skin, benzo[a]pyrene diol epoxide, conjugation, 173
- Guanine, DNA methylation, dimethyl sulfate, ethyleneimine, adenine, *N*<sup>6</sup>-methyl-*N*<sup>6</sup>-formyl-2,5,6-triamino-4-oxypyrimidine, 289
- Hemochromatosis, hepatotoxicity, iron, lipid peroxidation, oxy-radicals, iron overload, 183
- Hemolysis, structure-hematotoxicity relationships, *N*-alkoxyacetic acids, erythrocytes, ethylene glycol ethers, ATP depletion, 339
- Hepatotoxicity, hemochromatosis, iron, lipid peroxidation, oxy-radicals, iron overload, 183
- Human lymphocytes, metallothioneins, flow cytometry, cadmium, 117
- Human skin, glutathione transferase, benzo[a]pyrene diol epoxide, conjugation, 173
- Hydrogen peroxidase, superoxide, superoxide dismutase, *Escherichia coli*, cytotoxicity, 281
- 4-Hydroxypentenol, aldehydes, methylglyoxal, Yoshida ascites hepatoma AH-130, cell cycle, labelled mitoses, 227

- Inhibition of RNA synthesis in vitro, nitracrine, acridine dimers, DNA binding, 73
- Iron, hemochromatosis, hepatotoxicity, lipid peroxidation, oxy-radicals, iron overload, 183
- Iron overload, hemochromatosis, hepatotoxicity, iron, lipid peroxidation, oxy-radicals, 183
- Labelled mitoses, aldehydes, methylglyoxal, 4-hydroxypentenol, Yoshida ascites hepatoma AH-130, cell cycle, 227
- Levonorgestrel, rat liver, ultrastructure, mitochondria, glutathione, glutathione S-transferase, cytochrome P-450-system, 157
- Lipid peroxidation, hemochromatosis, hepatotoxicity, iron, oxy-radicals, iron overload, 183
- Lipoxygenase, singlet oxygen, peroxidase, eosinophil, neutrophil, bleomycin, 1
- Liver, glutathione, mitochondria, myocardium, glutathione-depletion, oxidative protection, 29
- Lung, 2-(2-chlorophenyl)-2-(4-chlorophenyl)-1,1-dichloroethane (DDD), dichlorodiphenyltrichloroethane (DDT), covalent binding, mouse, 63
- Metallothioneins, human lymphocytes, flow cytometry, cadmium, 117
- Methylglyoxal, aldehydes, 4-hydroxypentenol, Yoshida ascites hepatoma AH-130, cell cycle, labelled mitoses, 227
- N<sup>3</sup>-Methyl-N<sup>4</sup>-formyl-2,5,6-triamino-4-oxopyrimidine, DNA methylation, dimethyl sulfate, ethyleneimine, adenine, guanine, 289
- Mitochondria, glutathione, myocardium, liver, glutathione-depletion, oxidative protection, 29
- Mitochondria, levonorgestrel, rat liver, ultrastructure, glutathione, glutathione S-transferase, cytochrome P-450-system, 157
- Mixed-function oxidations, cytochromes P-450, molecular orbitals, 263
- Mixed disulfides, glutathione, glutathione disulfide, glutathione S-sulfonate, A549 cells, 145
- Molecular orbitals, cytochromes P-450, mixed-function oxidations, 263
- Monooxygenase, benzo[a]pyrene-DNA-adducts, synchronous fluorescence spectrophotometry, aryl hydrocarbon hydroxylase, cigarette smoke, mouse, 51
- Mouse, benzo[a]pyrene-DNA-adducts, synchronous fluorescence spectrophotometry, aryl hydrocarbon hydroxylase, monooxygenase, cigarette smoke, 51
- Mouse, 2-(2-chlorophenyl)-2-(4-chlorophenyl)-1,1-dichloroethane (DDD), dichlorodiphenyltrichloroethane (DDT), lung, covalent binding, 63
- mRNA, glutathione S-transferases, regulation, perfluorodecanoic acid, enzyme activities, 127
- Myeloperoxidase, peroxidases, eosinophil peroxidase, thiols, oxidation, peroxidase-oxidase, 323
- Myeloperoxidase, peroxidases, thiols, serotonin, oxidation, peroxidase-oxidase, 305
- Myocardium, glutathione, mitochondria, liver, glutathione-depletion, oxidative protection, 29
- Nephrotoxicity, glutathione, cisplatin, toxicity, 89
- Neutrophil, singlet oxygen, peroxidase, eosinophil, lipoxygenase, bleomycin, 1
- Nitracrine, acridine dimers, DNA binding, inhibition of RNA synthesis in vitro, 73
- Nuclear magnetic resonance, diamino-cyclohexaneplatinum(II), DNA-adducts, 39
- Oxidant stress, acetaminophen, biliary GSSG efflux, diethyl maleate, 241
- Oxidation, peroxidases, myeloperoxidase, eosinophil peroxidase, thiols, peroxidase-oxidase, 323
- Oxidation, peroxidases, myeloperoxidase, thiols, serotonin, peroxidase-oxidase, 305
- Oxidative protection, glutathione, mitochondria, myocardium, liver, glutathione-depletion, 29
- Oxy-radicals, hemochromatosis, hepatotoxicity, iron, lipid peroxidation, iron overload, 183
- Perfluorodecanoic acid, glutathione S-transferases, mRNA, regulation, enzyme activities, 127
- Peroxidase, singlet oxygen, eosinophil, neutrophil, lipoxygenase, bleomycin, 1
- Peroxidase-oxidase, peroxidases, myeloperoxidase, thiols, serotonin, oxidation, 305
- Peroxidase-oxidase, peroxidases, myeloperoxidase, eosinophil peroxidase, thiols, oxidation, 323
- Peroxidases, myeloperoxidase, eosinophil peroxidase, thiols, oxidation, peroxidase-oxidase, 323

- Peroxidases, myeloperoxidase, thiols, serotonin, oxidation, peroxidase-oxidase, 305
- Purification, 5,5-dimethyl-1-pyrroline-*N*-oxide, synthesis, storage, experimental synthetic precautions, chemical vs. EPR purity, spin trapping, 167
- Rat liver, levonorgestrel, ultrastructure, mitochondria, glutathione, glutathione *S*-transferase, cytochrome *P*-450-system, 157
- Redox interaction, m-AMSA, doxorubicin, 103
- Reductive activation, DNA alkylation, antitumour drugs, DNA interstrand cross-links, 249
- Regulation, glutathione *S*-transferases, mRNA, perfluorodecanoic acid, enzyme activities, 127
- Serotonin, peroxidases, myeloperoxidase, thiols, oxidation, peroxidase-oxidase, 305
- Singlet oxygen, peroxidase, eosinophil, neutrophil, lipoxygenase, bleomycin, 1
- Spin trapping, 5,5-dimethyl-1-pyrroline-*N*-oxide, synthesis, purification, storage, experimental synthetic precautions, chemical vs. EPR purity, 167
- Storage, 5,5-dimethyl-1-pyrroline-*N*-oxide, synthesis, purification, experimental synthetic precautions, chemical vs. EPR purity, spin trapping, 167
- Structure-hematotoxicity relationships, *N*-alkoxyacetic acids, hemolysis, erythrocytes, ethylene glycol ethers, ATP depletion, 339
- Superoxide, hydrogen peroxidase, superoxide dismutase, *Escherichia coli*, cytotoxicity, 281
- Superoxide dismutase, hydrogen peroxidase, superoxide, *Escherichia coli*, cytotoxicity, 281
- Synchronous fluorescence spectrophotometry, benzo[a]pyrene-DNA-adducts, aryl hydrocarbon hydroxylase, monooxygenase, cigarette smoke, mouse, 51
- Synthesis, 5,5-dimethyl-1-pyrroline-*N*-oxide, purification, storage, experimental synthetic precautions, chemical vs. EPR purity, spin trapping, 167
- Thiols, peroxidases, myeloperoxidase, eosinophil peroxidase, oxidation, peroxidase-oxidase, 323
- Thiols, peroxidases, myeloperoxidase, serotonin, oxidation, peroxidase-oxidase, 305
- Toxicity, glutathione, cisplatin, nephrotoxicity, 89
- Ultrastructure, levonorgestrel, rat liver, mitochondria, glutathione, glutathione *S*-transferase, cytochrome *P*-450-system, 157
- Yoshida ascites hepatoma AH-130, aldehydes, methylglyoxal, 4-hydroxypentenol, cell cycle, labelled mitoses, 227
